The calls for service data are generated based on specific address information. The information in this report is based on georeferenced addresses and may change as the geobase is improved and/or updated. Copies of individual reports are available for a fee through Public Records at 1717 E Grant St, Suite 100, Phoenix, AZ 85034. Calls are based on the final call type as entered by Communications and/or Patrol. All dispatched and call back calls are included regardless of the final disposition of the call (i.e. report written, no action required, etc.). Self-initiated (officer initiated on view (OV) calls are shown in a separate table above, and non dispatched calls are excluded from counts in this report. Implementation of a new Computer Aided Dispatch (CAD) system occurred on March 9, 2010. Grid, beat, and precinct boundaries changed effective October 20, 2014. Information in this report is based on these boundaries regardless of when the incident occurred. New radio codes are periodically added; use caution when comparing totals across years.
